Approximate "normal" high tide line

Section line

NOTES

1) The location of "normal" high tide and of the Shoreland Zone shown hereon is approximate, based on 1978 photogrammetry by the James Sewall Co. of Old Town, Maine. "Normal" high tide is assumed to be six feet above mean tide, as shown on the Sewall plan.
The current Zoning Ordinance defines a Shoreland District which is to "begin at the normal high water line of the waters surrounding the Island and extend inland on a horizontal line 250 feet."

2) Lot lines shown hereon are approximate, and are intended solely for the purpose of parcel identification. For more specific information, refer to boundary surveys recorded at the Cumberland County Registry of Deeds.

Revised to show changes made by the Bustins Island Village Corporation through August 2, 2003.
