

Solid Waste and Recycling Committee Mission Statement

The Town of Freeport Recycling and Solid Waste Committee endeavors to support the citizens and businesses of Freeport to improve our waste reduction efforts. It is our goal to maximize recycling and composting while simultaneously working to minimize the amount of waste that we produce.

We strive to offer our students, citizens, businesses and visitors assistance and practical opportunities for waste reduction, reusing, recycling and composting.

We work with the Town Transfer Station and waste haulers to increase the rate of recycling, composting and waste reduction through the most up-to-date practices, and support the Manager as needed.

We give advice and make recommendations to the Town Council and municipal bodies on issues related to waste reduction.
